

HCI - ASSIGNMENT 4 - PERSONAL WEBSITE

<https://jasminebarchetti.wixsite.com/portfolio/projects-1>

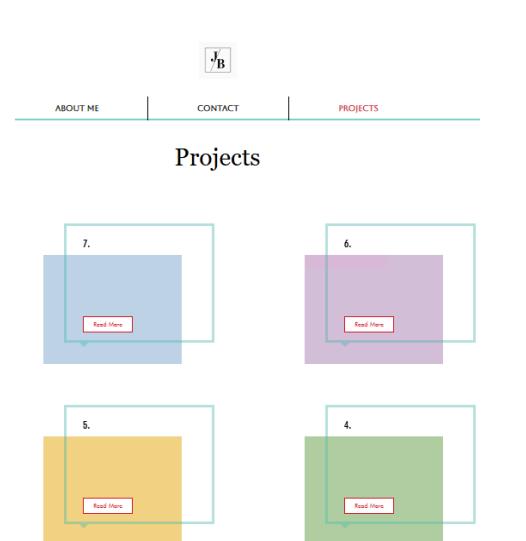

My website presents a professional yet friendly version of myself. It reflects who I am, a Business Informatics student focused on Digital Marketing, and what I value: clarity, simplicity, and approachability. The clean layout, minimal color palette, and clear navigation (About Me, Projects, Contact) make the site easy to explore and focused on what matters. One of my biggest challenges was keeping it simple but complete, since I didn't want to overload it with every project. I solved this by limiting the structure to three main pages, using plenty of white space, and choosing one calm accent color to maintain visual balance. These choices highlight the content instead of distracting from it. Overall, the design translates my values and identity into the interface professional but approachable, clear but personal showing that I care about both functionality and aesthetics.

The screenshot shows the 'About Me' section of the website. At the top, there's a navigation bar with 'ABOUT ME', 'CONTACT', and 'PROJECTS'. Below the navigation is a sub-navigation menu with '- Jasmine Barchetti -' and a dropdown arrow. A black and white line drawing of a person with long dark hair sitting at a desk with a laptop is centered. Below the illustration, there's a small paragraph of text: 'Hi! I'm Jasmine, a university student in Business Informatics with a focus on Digital Marketing. This website is part of my academic journey - a space where I collect and share the projects I've created during my studies.'

The screenshot shows the 'Contact' section. It features a large title 'Contact' and a form with three input fields: 'Name', 'Cognome', and 'Email'. Below the form is a black button labeled 'Invia'.

The screenshot shows the 'Projects' section. At the top, there's a navigation bar with 'ABOUT ME', 'CONTACT', and 'PROJECTS'. Below the navigation, the word 'Projects' is centered. Four colored boxes are arranged in a grid: a blue box with number 7 and a red 'Read More' button, a purple box with number 6 and a red 'Read More' button, a yellow box with number 5 and a red 'Read More' button, and a green box with number 4 and a red 'Read More' button.
